
Sandeep Kumar

Salesforce & Heroku Architect | Full Stack Developer

sandeepkhoj@gmail.com

+91 9261231405

Jaipur, Rajasthan, India

[LinkedIn ↗](#)

[GitHub ↗](#)

15+ years building enterprise software, with the last decade specialising in Salesforce architecture and full-stack development. Co-founder of CloudAlgo, delivering 70+ projects across Salesforce, Heroku, React, and Node.js for global clients. Experienced across the full spectrum — from greenfield platform builds to complex enterprise migrations.

| EXPERIENCE

Co-Founder / Salesforce & Heroku Architect

Jan 2022 – Present

CloudAlgo · Jaipur, India

- Co-founded CloudAlgo from zero, growing it into a certified Salesforce consulting practice delivering 70+ enterprise projects
 - Serve as architect and technical lead across all engagements — Apex, Lightning Components, Visualforce, Heroku, and REST/SOAP integrations
 - Own the full delivery lifecycle: scoping, estimation, team leadership, client communication, and deployment
 - Implemented Salesforce DX + GitHub Actions CI/CD pipelines, reducing deployment risk and eliminating manual release processes
 - Hands-on coder and code reviewer — defined quality standards, security practices, and architecture patterns adopted across all projects
-

Platform Architect

Jun 2019 – Dec 2021

Traction On Demand · Remote

- Led development of Traction REC, a Salesforce-native recreation platform covering memberships, programmes, facility bookings, fundraising, and community engagement
 - Designed and built multiple greenfield Salesforce components end-to-end — from data model through Lightning UI
 - Established and led a distributed Agile development team, defining workflows and delivery cadence
 - Served as Technical Architect and Node.js lead for Traction X-Ray — built metadata scanners, analytics processing, and automated PDF/Google Sheet report generation to surface Salesforce org technical debt
-

Technical Architect | Principal Consultant

Dec 2013 – Jun 2019

Appirio · Jaipur, India

- Principal Consultant and Technical Architect across 8+ concurrent client engagements over 5.5 years at a global Salesforce SI
 - Rebuilt LillyNow intranet (40,000 users, 120 countries), consolidating 80+ disparate portals into a unified Node.js / React / Contentful platform
 - Sole developer on BMC MyEBC iOS app — owned design, development, testing, and App Store deployment end to end
 - Led mobile delivery for Lids (React Native) and Nightingale Conant (Ionic/Cordova), building Heroku microservices backends for both
 - Delivered enterprise integrations: bidirectional Office 365–Salesforce calendar sync for Align Technology; IBM Watson-powered product testing platform for Mesh01
-

Senior Software Engineer

May 2012 – Dec 2013

Metacube Private Limited · Jaipur, India

- Built Aegerion Pharmaceuticals patient portal on Salesforce — external community users tracking LDL-C levels and dietary plans, responsive across mobile and desktop
 - Implemented Experian Service Cloud with web-to-case, email-to-case, case assignment and escalation rules, and Knowledge One
 - Delivered Teva Pharmaceutical social intranet (Edgeforce) — 40,000+ employees collaborating and accessing documents across mobile, iPad, and desktop
 - Built Logitech B:C Service Cloud case management system with Customer Community, accessible on iPad, desktop, and iPhone
-

Software Engineer

Xtreme Infosoft Private Limited · Jaipur, India

Feb 2010 – May 2012

- Developed Sales Rep Application for Delta Electronics India (ASP.NET, SQL Server, jQuery) — enabled sales reps to configure and present products to clients, with approved orders routed directly to production
- Built College Automation System (ASP.NET, SQL Server, jQuery) — web platform covering fee management, performance tracking, staff administration, and database management

PROJECTS

Traction REC

TRACTION ON DEMAND

Recreation management system tightly integrated with Salesforce. Enabled parks and recreation departments to manage facility bookings, memberships, and programme registrations natively on the Salesforce platform.

Salesforce

Apex

Lightning Components

Visualforce

Traction X-Ray

TRACTION ON DEMAND

Salesforce org health and metadata analysis tool. Built scanners that inspect org metadata depth and breadth, generating detailed PDF and Google Sheet reports to help architects understand technical debt and org complexity.

Salesforce

Apex

Metadata API

Google Sheets API

LillyNow Portal

ELI LILLY (VIA APPIRIO)

Consolidated 80+ disparate employee portals into a single unified intranet serving 40,000 employees across 120 countries. Built on Node.js and React.js with Contentful for content management and Kaltura for video delivery, deployed on Heroku.

Node.js

React.js

Contentful

Kaltura REST API

Heroku

Lids Mobile App

LIDS (VIA APPIRIO)

React Native shopping app for North America's largest headwear retailer — browsing, purchasing, and Access Pass loyalty programme on iOS and Android. Built a suite of Heroku microservices to bridge the legacy backend with the mobile frontend.

React Native

iOS

Android

Heroku

Node.js

Microservices

Align Technology Calendar Integration

ALIGN TECHNOLOGY (VIA APPIRIO)

Bidirectional calendar sync between Office 365 and Salesforce for Align Technology's global sales team. Events created or updated in either system propagate automatically, eliminating double-entry and keeping field reps in sync.

Salesforce Office 365 REST API
Node.js

Mesh01

MESH01 (VIA APPIRIO)

Product testing platform where businesses launch campaigns, collect structured tester feedback, and receive AI-generated sentiment analysis via IBM Watson. Built on a Node.js / AngularJS / MongoDB stack with graphical reporting dashboards.

Node.js AngularJS MongoDB
IBM Watson Heroku

BMC MyEBC

BMC SOFTWARE (VIA APPIRIO)

iOS app for BMC executives and customers to schedule enterprise sales demos and briefings. Delivered solo as single point of contact — responsible for design, development, QA, and App Store submission.
