ABOUT

Salesforce and Heroku architect with 16+ years of enterprise delivery and a decade on the Salesforce platform. Co-founder of CloudAlgo, where I have scoped, architected and shipped 70+ projects for clients in pharma, retail, recreation and enterprise software. I take an engagement from a rough brief to a running system: data model, integrations, Lightning UI, Heroku services, CI/CD, and the code review that keeps it maintainable after I hand it over.

16+ years in software **70+** projects delivered **8** Salesforce certifications

EXPERIENCE

2022 — PRESENT

Jan 2022 – Present

● Co-Founder / Salesforce & Heroku Architect

CloudAlgo · Jaipur, India

- Co-founded CloudAlgo in 2022 and grew it from zero into a Salesforce consulting practice that has delivered 70+ projects for clients across North America, Europe and Asia
- Architect and technical lead on every engagement: data modelling, Apex and Lightning Web Components, Visualforce, Heroku services, and REST/SOAP integrations with ERP, marketing and identity systems
- Own delivery end to end — discovery workshops, scoping and estimation, sprint planning, client communication, release and hypercare — so clients deal with one accountable person from brief to go-live
- Built Salesforce DX and GitHub Actions CI/CD pipelines with scratch-org validation and automated test runs, replacing manual change sets and cutting deployment risk on every release
- Still hands-on: write production code daily, review every pull request, and set the security, quality and architecture standards the whole team follows
- Mentor developers and consultants on platform patterns, from governor-limit-safe Apex to reusable LWC component design

2019 — 2021

Jun 2019 – Dec 2021

○ Platform Architect

Traction On Demand · Remote

- Led development of Traction REC, a Salesforce-native recreation management product used by parks and recreation departments for memberships, programme registration, facility bookings, fundraising and community engagement
- Designed and built greenfield product components end to end: custom objects and sharing model, Apex services, Lightning UI, and packaging for distribution across customer orgs
- Built and led a distributed Agile team across time zones; set the sprint cadence, code review standards and release workflow the team still runs on
- Technical Architect and Node.js lead for Traction X-Ray, an org-analysis tool: built metadata scanners, analytics processing, and automated PDF and Google Sheets reports that show architects exactly where the technical debt in a Salesforce org sits

2013 — 2019

Dec 2013 – Jun 2019

○ Technical Architect | Principal Consultant

Appirio · Jaipur, India

- Principal Consultant and Technical Architect on 8+ concurrent enterprise engagements over five and a half years at a global Salesforce SI, spanning pharma, retail, med-tech and enterprise software
- Rebuilt LillyNow, Eli Lilly's employee intranet, replacing 80+ disparate portals with one Node.js / React / Contentful platform on Heroku serving 40,000 employees in 120 countries
- Sole developer on the BMC MyEBC iOS app: owned design, Swift development, QA and App Store release, backed by a Salesforce Community
- Led mobile delivery for Lids (React Native, iOS and Android) and Nightingale Conant (Ionic/Cordova), and built the Heroku microservices that connect each app to its legacy backend
- Delivered enterprise integrations including a bidirectional Office 365–Salesforce calendar sync for Align Technology's global sales team and an IBM Watson-powered feedback analysis platform for Mesh01
- Ran technical discovery and solution design with client architects, turning requirements into estimates, architecture documents and delivery plans

2012 — 2013

May 2012 – Dec 2013

○ Senior Software Engineer

Metacube Private Limited · Jaipur, India

- Built the Aegerion Pharmaceuticals patient portal on Salesforce Communities, where external patients track LDL-C levels and dietary plans in a responsive UI on phone and desktop

- Implemented Experian's Service Cloud: web-to-case and email-to-case, assignment and escalation rules, and Knowledge One so agents resolve cases from one console
- Delivered Edgeforce, Teva Pharmaceutical's social intranet, giving 40,000+ employees document access and collaboration on mobile, iPad and desktop
- Built Logitech's B:C Service Cloud case management system with a Customer Community, working consistently across iPad, desktop and iPhone

2010 – 2012
Feb 2010 – May 2012

Software Engineer

Xtreme Infosoft Private Limited · Jaipur, India

- Developed a Sales Rep Application for Delta Electronics India (ASP.NET, SQL Server, jQuery) that let field reps configure and present products with clients on site and route approved orders straight to production
- Built a College Automation System (ASP.NET, SQL Server, jQuery) covering fee management, student performance tracking, staff administration and reporting

SELECTED PROJECTS

TRACTION ON DEMAND

Traction REC

Recreation management product built natively on Salesforce for parks and recreation departments. Residents register for programmes, book facilities and manage memberships; staff run everything from one org with standard Salesforce reporting. I designed the data model and sharing, built the Apex services and Lightning UI, and packaged it for distribution across customer orgs.

Salesforce · Apex · Lightning Components · Visualforce

ELI LILLY via Appirio

LillyNow Portal

Eli Lilly's employee intranet, rebuilt to replace 80+ separate portals with one platform for 40,000 employees across 120 countries. Node.js and React on Heroku, Contentful for editorial content, Kaltura for video. Editors publish once; employees get one search, one navigation and one login.

Node.js · React.js · Contentful · Kaltura REST API · Heroku

ALIGN TECHNOLOGY via Appirio

Align Technology Calendar Integration

Bidirectional calendar sync between Office 365 and Salesforce for Align Technology's global sales team. Meetings created or changed in either system propagate automatically, so reps stop double-entering and managers see real field activity in Salesforce.

Salesforce · Office 365 · REST API · Node.js

BMC SOFTWARE via Appirio

BMC MyEBC

iOS app for BMC executives and customers to book enterprise briefings and product demos, backed by a Salesforce Community. Delivered solo as the single point of contact: design, Swift development, QA and App Store submission.

iOS · Swift · Salesforce Community

TECHNICAL SKILLS

PROFICIENT

Salesforce, Apex, Lightning Web Components, Visualforce, JavaScript, TypeScript, Node.js, React, React Native, Next.js, Heroku, AWS, MongoDB, PostgreSQL, REST / SOAP APIs

COMFORTABLE

Vue.js, Angular, Swift (iOS), Ionic, Java, Serverless, Redis

FAMILIAR

Python, C++

CERTIFICATIONS

SALESFORCE CERTIFIED

Administrator · Platform App Builder · Platform Developer I · Platform Developer II · Sales Cloud Consultant · Service Cloud Consultant · Sharing and Visibility Designer · Integration Architecture Designer

OTHER

OCP, Java SE Programmer · DOEACC A Level

EDUCATION

- 2010 **Master in Computer Science**
Punjab Technical University
- 2008 **MS, Information Technology**
Punjab Technical University

I keep current by reading platform release notes and building small things with new tooling before a client needs it. Off the keyboard: tabletop gaming, video games and travel.
