

## EXPERIENCE

2022

Now

### Co-Founder / Salesforce & Heroku Architect

CloudAlgo · Jaipur, India

- Co-founded CloudAlgo from zero, growing it into a certified Salesforce consulting practice delivering 70+ enterprise projects
- Serve as architect and technical lead across all engagements — Apex, Lightning Components, Visualforce, Heroku, and REST/SOAP integrations
- Own the full delivery lifecycle: scoping, estimation, team leadership, client communication, and deployment
- Implemented Salesforce DX + GitHub Actions CI/CD pipelines, reducing deployment risk and eliminating manual release processes
- Hands-on coder and code reviewer — defined quality standards, security practices, and architecture patterns adopted across all projects

2019

2021

### Platform Architect

Traction On Demand · Remote

- Led development of Traction REC, a Salesforce-native recreation platform covering memberships, programmes, facility bookings, fundraising, and community engagement

↓ DOWNLOAD PDF

- Designed and built multiple greenfield Salesforce components end-to-end — from data model through Lightning UI
- Established and led a distributed Agile development team, defining workflows and delivery cadence
- Served as Technical Architect and Node.js lead for Traction X-Ray — built metadata scanners, analytics processing, and automated PDF/Google Sheet report generation to surface Salesforce org technical debt
